Description

{tab title="Description" class="red solid"}
JDV's open-faced CSW bit is fast and easy to use. This bit cuts, strips, and wraps the wire in one simple operation.
There's no need for wire preparation since this tool can wrap wire directly from a reel or harness.

CSW tools may not work with all wire types, and it's recommended to send sample wire to JDV for test wraps to make sure it works

properly with these CSW tools.
